

2012 Emergent Issue

Project #:
 Year of Last Rehabilitation: NA
 Year of Last Gravelling: NA
 Hours of Grading: NA
 Road #: SW Czar Access
 Division #: 6
 Length of Project: Failures throughout,
 approximately 1/2 mile
 Traffic Count:
 Traffic Count Date:

The failures on the SW Czar Access
 will be repaired by milling the top and
 reshaping. A heavy application of
 Calcium (3 to 4 Liters of per square
 meter will be applied). The driving
 surface will then be packed with the
 steel drum and wobbly packers. After
 a cure period a light cover for traction of
 gravel will be applied if required.
